

1 SLOT STANDARD ANGLE

4 SLOT STANDARD ANGLE

General Information:

The slots and mounting holes are centered on the horizontal flat leg of the angle. Loads on these tables are based on utilizing the outside mounting holes.

Load ratings are listed for two materials having the following properties:

Material	Yield Stress (KSI)	Mod of Elasticity (KSI)
304/316 Stainless Steel	30	28100
6061-T6 Aluminum	37	10000

Load ratings are based on ASD, 9TH Edition, Section F1, however it is suggested that the loads in the tables be reduced by a Factor of Safety of 2 for safe performance.
