

Rocket Rod

Description

Rocket Rod is NSF certified all thread rod available in 304 stainless or zinc plated steel with a FDA compliant encasement. The encasement provides a clean professional installation. Our proprietary manufacturing process ensures the encasement is applied with no spaces or gaps, eliminating risk of water or dirt ingress, wicking or exposed threads.

Rocket Rod is ideal for use in regulated facilities where hygiene and eliminating exposed threads is desired. Typical applications include use in food & beverage facilities, pharmaceuticals, and process plants.

Rocket Rod is stocked in 3/8" through 3/4" diameters in 6' & 12' lengths.

Features

- NSF certified to NSF/ANSI/3-A 14159-1
- FDA compliant PVC material encasement designed to be stripped precisely to eliminate thread exposure
- Available in 304 stainless or zinc plated steel to align with customer requirements
- All thread rod eliminates need for field threading
- Available from factory stock in 6' & 12' lengths
- Shipped in heavy wall corrugated tube for safe and easy handling

Material

- Zinc-Plated Steel
- 304 Stainless Steel

Finish

- White, FDA compliant PVC encasement
